

## CREATING AN INSPIRATIONAL MODERN NEW BUILD FAMILY HOME

### **BG CONSTRUCTION'S SOLUTION**

Mr and Mrs Lamport decided to move from London and build an inspirational modern home for their new family. They had a large plot of family land that enjoys uninterrupted views for miles. To maximise the south facing plot they created a triangular-shaped property meaning the glass fronted south elevation was the longest wall of the house.

The house was built to take into account the clients requirements, including an open plan triangular spacious kitchen and dining area, with family day area, a separate formal lounge, spacious bedrooms with ensuite bathrooms, feature gym, sauna and steam rooms. The impressive landscaping included a combination of composite decking, stone paving and natural water swimming pool.

“We tendered with some local contractors; two stood out and they were both a similar price. It was a difficult decision, but we went with BG Construction as we felt that they were willing to work with us and deliver us the house of our dreams...”

“After visiting BG Construction’s previous works, we had high expectations and they didn’t let us down. The team delivered the high-quality workmanship we required and the quality of the work in the house has been much admired by our friends.

BG Construction were skilled, friendly and approachable. We have a fantastic new house and a beautiful home.

It came in on budget. The house is wonderful and we are all still friends!”
