

ECO-FRIENDLY HOME, WITH OPEN PLAN SPACES, THAT IS LOW MAINTENANCE

BG CONSTRUCTION'S SOLUTION

Mr and Mrs Pull contacted BG Construction to help with the demolition of their bungalow to make way for a new build property. The couple had always lived in period properties and wanted a new build property which is eco-friendly, with open plan spaces, that is low maintenance. They initially contacted four contractors. Upon meeting BG Construction and seeing their portfolio, Mr and Mrs Pull were very happy to instruct them immediately.

CUSTOMER FEEDBACK

"I highly recommend BG Construction; they have created our home exactly as we imagined it would be. The team also pointed out new possibilities, providing great ideas for the construction of our orangery.

The team couldn't have been friendlier; they expertly guided us through the whole build. Even taking us to showrooms to select key items - like the bi-fold doors...

“The rooms are light and sunny just as we wanted. The trades ran back-to-back with no delays. Each and every tradesman was highly skilled, their attention to detail was first class. We are extremely pleased with the end results; their work surpassed all our expectations.

BG Construction kept us informed all the time and worked extremely well with our Architect. The whole team were incredibly friendly and it was a pleasure going onsite to see the build progress. The works were completed on time to budget.

The whole process was brilliant. I wholeheartedly recommend BG Construction.”
