

CASE STUDY

EXTENSION & RENOVATION

RETAINING THE PROPERTY'S FEATURES WHILE PROVIDING MODERN LIVING

BG CONSTRUCTION'S SOLUTION

Mr and Mrs Szczepanski wanted to renovate their home to meet their family's needs. The renovations provided modern living while retaining the property's original features. The build added a large extension and the downstairs area was completely opened out, creating an open flow throughout each room. Downstairs there's now an open plan sitting room, dining area, kitchen, and an alternative lounge. The extension doubled the space and almost all the rooms were refurbished. The upstairs space was also re-invented, all the bedrooms now have large ensuites with walk in wardrobes.

CUSTOMER FEEDBACK

Mr Szczepanski said, "we tendered our project to three and the wholehearted recommendations we heard gave us the confidence to choose BG Construction as our preferred contractor. The project was scheduled for a difficult time of year, running over the winter months, but BG Construction kept the project expertly on track, keeping us updated with costs and on-site decision making on a regular basis..."

“The works were completed within budget, with us adding extra jobs to the schedule once the initial build was finalised, such as replacing existing windows to match the new efficient ones and new tiling to the old roof. BG Construction took all of this in their stride, arranging the necessary additional trades without any dramas.

The team were polite and considerate and whenever a decision was required would consult us first rather than just doing it and hoping it would be right.

We love our new spaces; our only regret is we didn't do it sooner. With BG Construction, we have found ourselves a safe pair of hands and would not hesitate to recommend them to anyone considering going on a similar construction journey!”
