

CASE STUDY

EXTENSION & RENOVATION

A STUNNING VERSATILE GARDEN STUDIO

Mr and Mrs Roscoe engaged BG Construction to build a bespoke versatile garden studio to provide the family with multi-purpose space for either: entertaining, working from home, recreational use, or gymnasium. The studio is double glazed, has mains water, heating, mains drainage, CAT 5 cabling for wifi.

"We wanted a multi-purpose space for our teenagers to entertain friends, use as a home office and to enjoy as a recreational space for ourselves.

After visiting the Ideal Home show and undertaking some online research we found out the off-the-shelf studio solutions didn't meet our many requirements. We therefore contacted BG Construction, they had recently worked on our house extension so we knew the quality of their workmanship was outstanding.

We were very pleased that the bespoke solution they created, as it matched our versatile needs. The build worked out more cost effective than the standard constructions available.

On the job the team's communications were fluid; they were personable and a pleasure to have around. They often exceeded our expectations, and offered great advice on the build construction (like adding in wall shadow gaps to give the structure long-term durability). The team was on site consistently and were always friendly and approachable.

We are incredibly pleased with their work and highly recommend them to anyone considering a similar project."
